

CUPPONE

Tiziano

ELECTRIC PIZZA OVEN

The Tiziano range of ovens are designed to offer a wide range of equipment that will accommodate takeaways and small restaurants, where pizzas are only part of the menu or those with limited kitchen space. They cook pizzas in around 3-6 minutes, depending on the thickness of the base and whether you are cooking directly on the stone or in the pans.

Cuppone pizza ovens are incredibly versatile and can be used to cook different dishes such as pasta, jacket potatoes, fish, meat, vegetables, and much more. The Tiziano is capable of fast turnarounds during busy periods or for reheating and finishing off dishes that have been prepared in advance

The Tiziano is built with a simple control system consisting of two mechanical thermostats on each deck. This independently controls the temperature above and below the stones to ensure uniform cooking of the top and bottom of the pizza. The heating elements are designed to totally cover the surface of the deck, and the oven i protected by a manual resetting thermostat which will intervene in the event of any abnormal overheating.
